

BABULA CLEMENT
ASTROLOGER
TEACHER
BRISBANE

I have been a professional astrologer for over 30 years, practising mainly in Brisbane, and also in India, New Zealand, the UK and the Netherlands. I have lectured at FAA

Conferences in Brisbane, Sydney, Melbourne and Hobart and have run a number of 3-day Astrology Retreats for Women.

I was originally a self-taught astrologer, including teaching myself how to calculate and hand-draw the horoscope, a process I always loved. I was originally influenced by the brilliant work of Liz Greene and other psychological, soul-centred astrologers and continue to be inspired and to learn.

I love teaching and doing private consultations and my clients and students are my greatest teachers. I love the heart-connection and sharing that happens in that very personal space.

I have long held that astrology is a tool of healing, transformation and awakening. We humans are complex, multi-dimensional and carry layers of wounds and complexes from childhood, from family patterning, our relationships, schooling and from previous lives. We also are beings of consciousness, love and joy and are drawn to know who we are and to heal and transcend our limitations and conditioning. In other words, we want to know who we really are, what our soul purpose is and to live that fully.

I have recently become an artist.... a dream since childhood.... and am very passionate about supporting people to trust their heart and follow their dreams. Astrology can show the way.

Some of my astrological interests are the Black Moon Lilith, the Asteroid Goddesses, Childhood and Family Astrology, Medical Astrology, Chiron, and the big question: 'Who am I and Why Am I here?'

I'm available for private consultations in person or via Skype, Zoom, Whatsapp or Facebook Messenger. Ask to be added to my mailing list to receive my monthly Newsletter with updates of classes and workshops.

My Qualifications:

BA, Dip Ed, FAA Practitioners Diploma, QFA Fellow, Cert Counselling From the Heart, Reiki 11, Art of Allowing Facilitator. I have also studied the Australian Bush Flower Essences, Reiki, Aura Soma, Massage and Meditation and am a long follower of Natural Health.
